

SIMONSWERK
HINGE SYSTEMS

BEAUTIFUL

BLACK

Convincingly creative!

Matte black corresponds with the current spirit of time. Therefore, across all product brands, matte black hinges from SIMONSWERK enjoy unbroken enthusiasm. They stand for classic elegance and original individuality. In this way, they complete every room concept and create an impressive harmony.

“The cornerstone of an integral interior design concept begins in the detail. That is our passion and our aspiration for impressive architecture.”

Matte black
also on flush glass doors
with TECTUS® Glass

TECTUS®

The completely concealed hinge system

On light doors, the completely concealed TECTUS hinge in the finish matte black emphasises a design appearance in a class of its own. Embedded in dark doors, on the other hand, it enables a continuous, almost mystical ambiance.

A maximum of creative freedom

Natural oak wood, raw concrete or elegant stainless steel hinge systems from SIMONSWERK in the finish matte black can impress in any combination of materials. They complement subtle structures and uniquely coordinated compositions.

Aesthetic entry

Entrance doors are the business card of every building. They can be made of wood, steel, PVCu, aluminium or a combination of materials. SIMONSWERK offers the right counter-part for every style – of course also in a matte black finish!

VARIANT®

The universal hinge system for heavy-duty doors

Especially in the finish matte black, the knuckle hinge system of the VARIANT product brand can be used to create exclusive accents at every entrance and passageway – from classic to extravagant.

Eye catching and extremely versatile

Whether harmoniously tone-on-tone or deliberately full of contrast – beyond matte black, hinges from SIMONSWERK add exceptional charisma to any door system with high-quality, certified materials and a wide range of individually customised finishes.
